

An electrifying new generation of e-Transporter

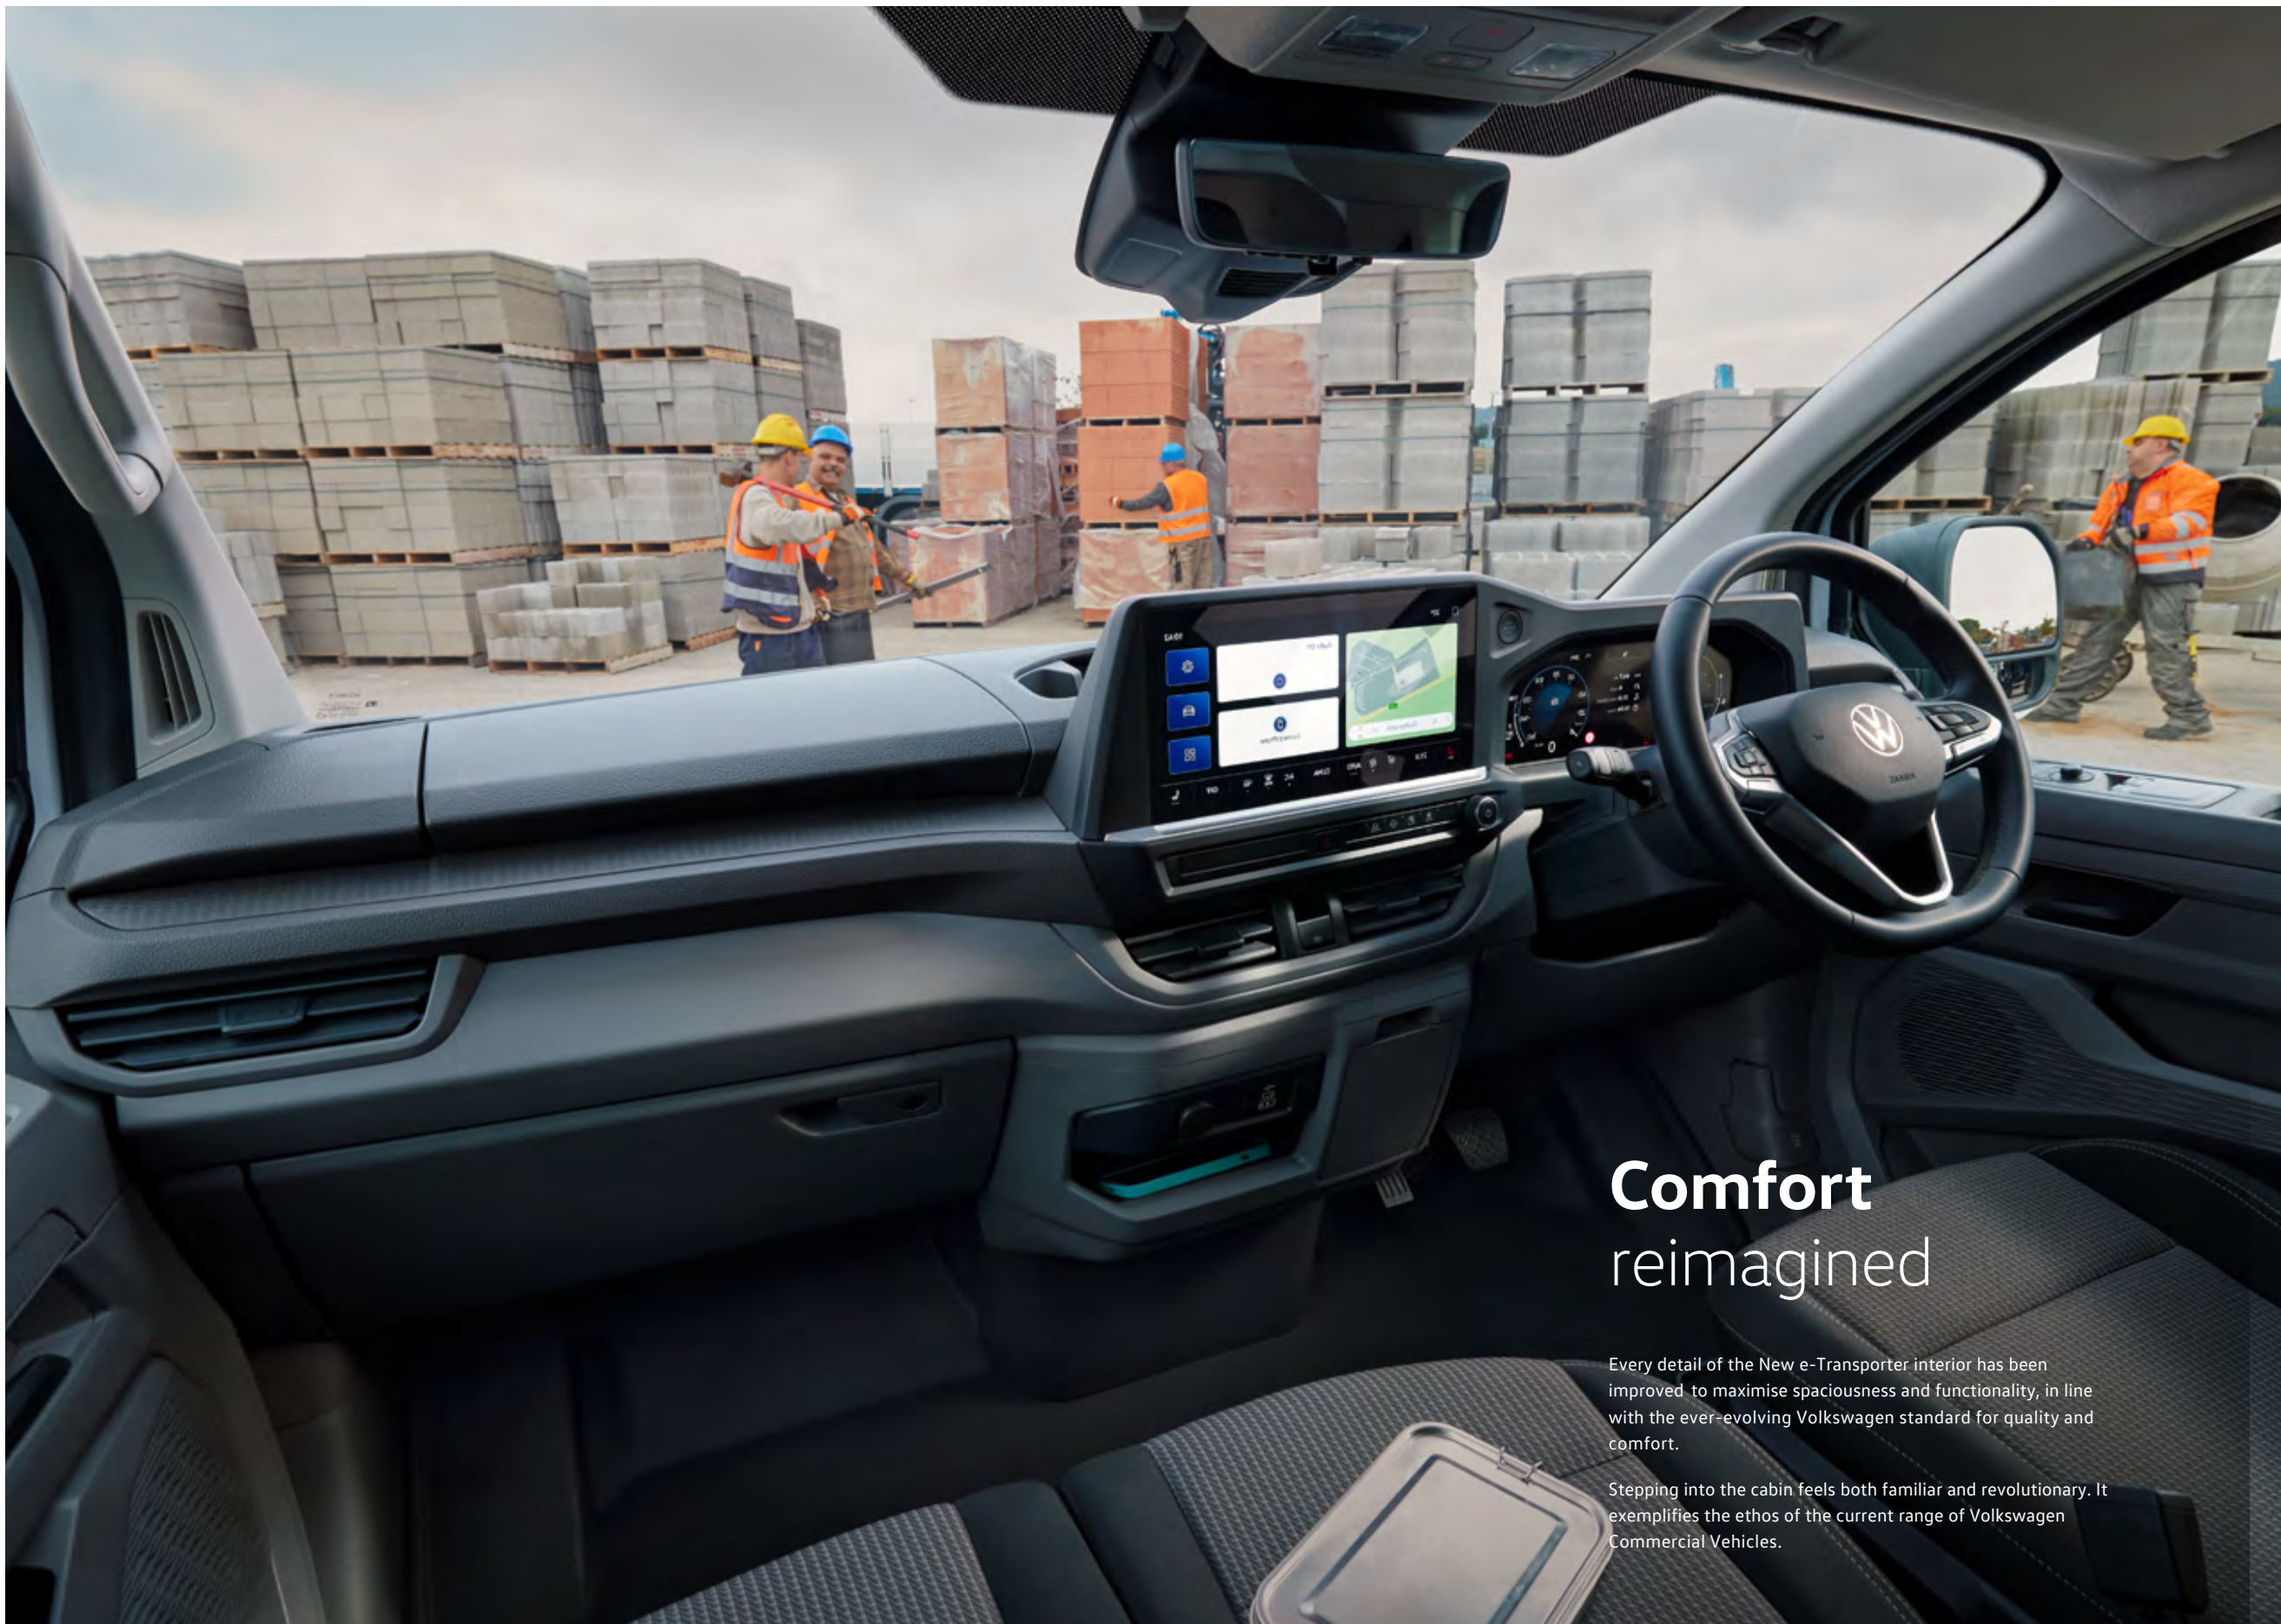

Commercial
Vehicles

The icon, evolved

The new e-Transporter improves on its award-winning predecessors in every way that matters.

It delivers a larger load compartment and heavier payload – making light work of substantial loads without compromising on manoeuvrability.

A larger cabin and new digital cockpit make for a more comfortable driving experience.

Comfort reimagined

Every detail of the New e-Transporter interior has been improved to maximise spaciousness and functionality, in line with the ever-evolving Volkswagen standard for quality and comfort.

Stepping into the cabin feels both familiar and revolutionary. It exemplifies the ethos of the current range of Volkswagen Commercial Vehicles.

Bigger loads, better performance

A more spacious load compartment, higher maximum payload, and increased towing capacity mean the new Transporter is ready to do some serious work.

The newly increased length makes it easy to stow Euro Pallets.

Increased load compartment of **6.8m³** (on longer wheelbase model)

Up to **1,088kg** maximum payload

Towing capacity of up to **2.3 tonnes**

146 mm longer than the Transporter 6.1

61 mm longer load compartment (base model) than the Transporter 6.1

Interior can be customised with partition walls to your needs

Choose between a boot lid or wide-opening wing doors

*The vehicle technical data in this brochure is provisional and pending final confirmation.

Modern Driver's Cabin with Large Display

More Than Just a (Driver's) Space

Interior Reimagined:

More Space, More Comfort, More Possibilities

Work Meets Comfort:

The driver's workspace in the New e-Transporter is a cockpit, office, and break room all in one. Stay on top of things with the innovative Digital Cockpit while modern assistance systems make your workday easier. Ergonomic seats, the latest commercial vehicle innovations like the optional 230V power hub for external devices, and VW Connect's mobile online services ensure you arrive relaxed. Numerous storage spaces and connections keep everything organized – from your smartphone to your lunchbox.

A Modern and Comfortable (Driver's) Workspace

- Multifunction Steering Wheel
- Exclusive to VW Commercial Vehicles: Storage Compartment with Lid on the Passenger Side
- Extended Front End Provides 60mm More Distance to the Partition Wall (compared to T6.1) and Increased Seating Comfort, Even for Taller People
- More Legroom for Passengers
- Numerous Cupholders
- Electronic Parking Brake
- Digital Cockpit and Easily Accessible 13-Inch Central Display

Premium Interior

The high-quality and modern equipment, as well as the design and materials used, convey more of a passenger car feel than a commercial vehicle impression. Customers say: "It's the material. It's not just a bunch of plastic. It feels like you're driving a passenger car."

A Spacious and Organised Driver's Cabin

With a variety of clever storage spaces and compartments, everything is always in its place. The increased distance to the partition wall provides more legroom on the double passenger seat and contributes to an enhanced sense of space in the driver's cabin.

New Features

Side & curtain airbags
for driver & co-driver

Storage console

Improved interior space & comfort
(+ 61 mm interior length)

New 13"
Infotainment

Keyless Start

Electronic
Park Brake

Ergonomic seats incl.
2-seater bench
(with underload function)

Digital Cockpit

Shifter for 8-speed
AT on steering column

6-way adjustable drivers seat incl.
2-way adjustable lumbar support
& armrests

Infotainment and Display

Digital Cockpit

The instrument cluster in the New Transporter and the New Caravelle is a high-resolution 12" TFT color display. Here, you have everything in view and can choose from various auxiliary displays in addition to the classic round instruments. The operation of the digital cockpit is typically VW, using the buttons on the right side of the multifunction steering wheel.

This way, you always have an overview of all important driving and vehicle information.

Infotainment System with Large Touch Color Display

The New Transporter and Caravelle models keep up with the times with their central control unit while also meeting the practical demands of their customers.

The 33 cm (13") large touch color display of the infotainment system offers excellent clarity and accessibility to all relevant information and functions.

Additionally, the usability has been improved with larger buttons that can be comfortably and accurately operated without distracting the driver.

Radio + Navigation System (optional) with 33 cm (13") Touch Color Display and Wireless App Connect (Apple/Android)

Everything Under Control with Wireless App-Connect

With the standard Wireless App-Connect, you can bring your apps into the car.

Selected content from your smartphone can be accessed directly on the infotainment system's display and safely operated within your field of vision.

Phone, Messages, Appointments, Contacts – all this and much more is just a touch away in the New Transporter and the New Caravelle.

With the standard Wireless App Connect and the optional navigation system, you are perfectly equipped for any task and will always reach your destination relaxed and safely.

Driveability enhanced

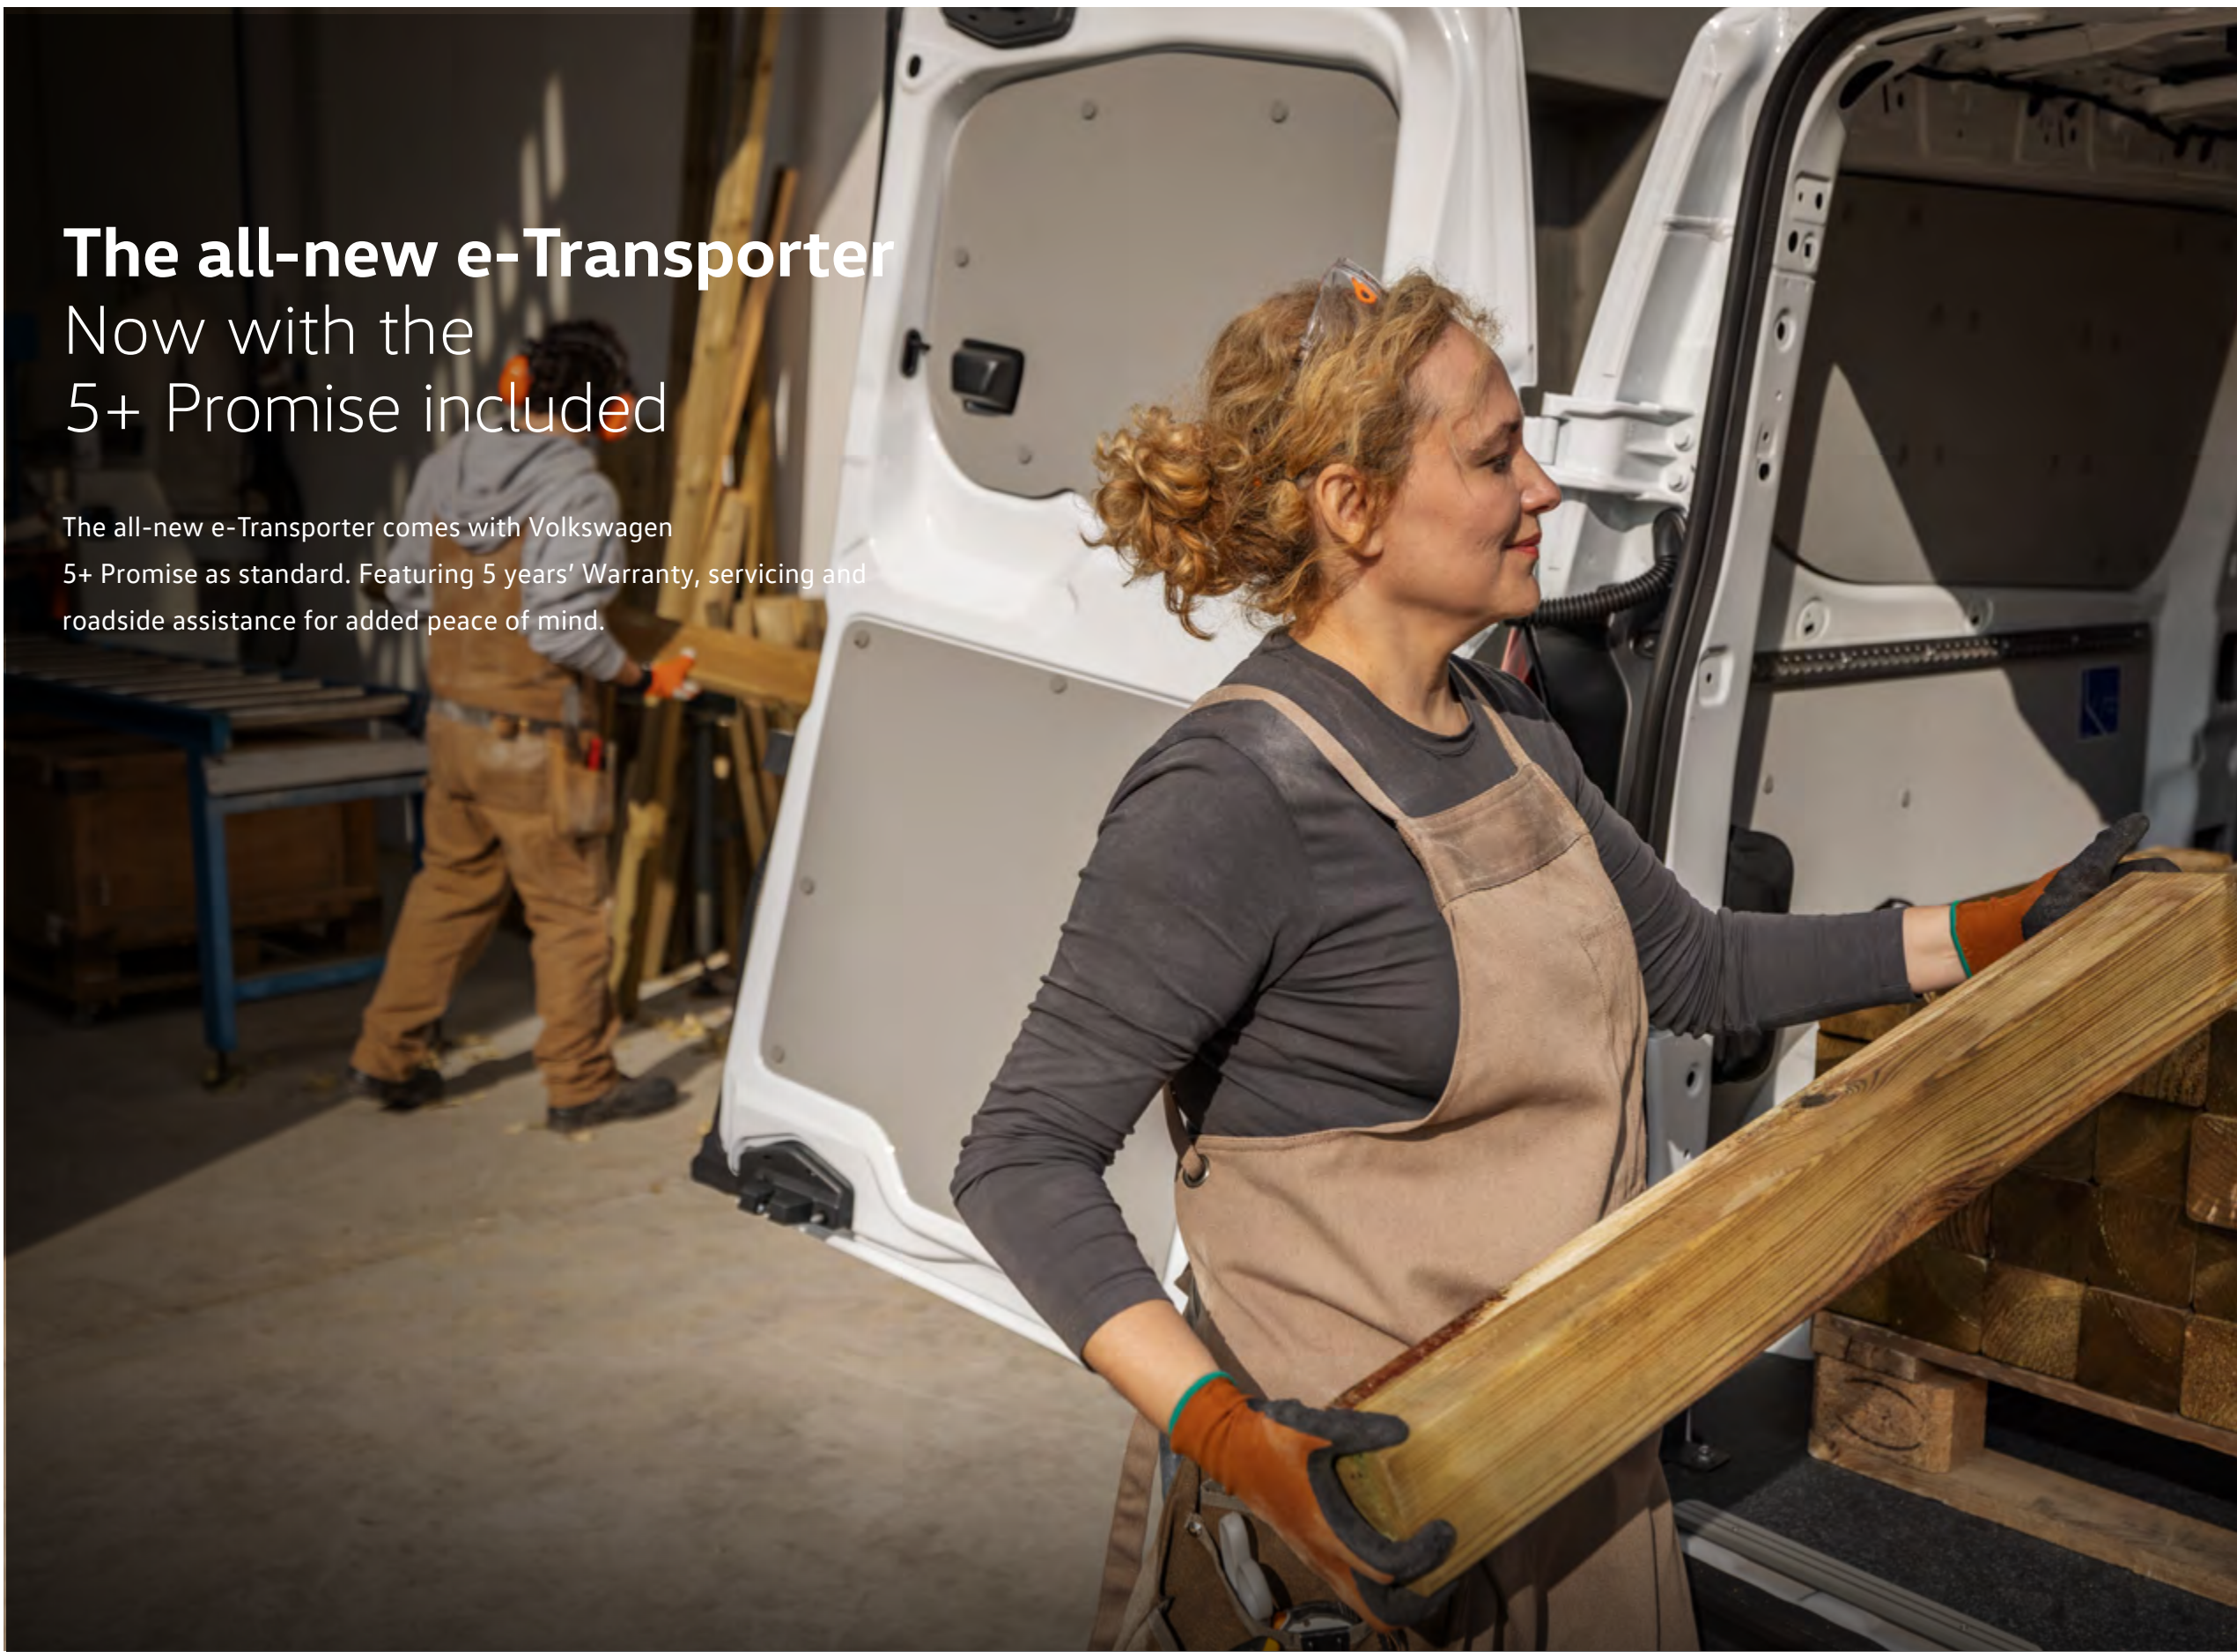

Despite its increased load capacity, the standard New e-Transporter remains under 2.0 metres in height for easy access to conventional multi-storey car parks. While a turning circle of only 11.9 metres makes light work of tight bends and manoeuvres.

All-electric models have rear-wheel drive; an all-wheel drive version will be available at a later date.

The all-new e-Transporter

Now with the 5+ Promise included

The all-new e-Transporter comes with Volkswagen 5+ Promise as standard. Featuring 5 years' Warranty, servicing and roadside assistance for added peace of mind.

An innovative powertrain range

This generation of e-Transporter is available in two drive options

All-electric drive variants: 100 kW (136 PS)

All-electric drive variants: 160 kW (218 PS)

Charging forwards

Power your tools on the go with the option of a 230 V power hub (400 W), including a converter to power large electrical devices of all kinds. An inverter with an output of 2.3 kW will be available for the eTransporter variant.

And keep your smartphone powered up too, with inductive charging via a stowage tray in the centre console. Further devices can be charged using up to seven USB-C, USB-A and 12-volt outlet (optional equipment).

Images are for illustration purposes only. Vehicles are European specification and may not reflect Irish specification.

New e-Transporter

Trendline

Exterior features	Cab area	Cargo area	Safety and driver assistance
16" steel wheels 6.5J	2-seater bench and single drivers seat in cab	2 LED lights in roof of load compartment	Cruise control system with predictive speed limiter
Goodyear summer tires	2-seater bench with load-through system (with partition in panel van) and folding table (pulls out from middle seat)	Black plastic scuff plate for sliding door, not illuminated	Double-sound horn
